Precipitation probability							
<05%	20%	20%	90%	90%	90%	50%	50%

Forecast for Sunday 13 Dec 2020

Weather: Mainly dry overnight but cloud thickening and lowering around dawn. Soon after daybreak a band of rain will spread into across the Brecon Beacons from the west. Rain will be heavy at times and quite persistent through the middle of the day becoming lighter and more drizzly by nightfall.

Chance of cloud free mountain/hill tops above 600m: In the early morning there is a slight chance of cloud free tops but for most of daylight hours the hill tops will be shrouded with extensive low cloud above 400m.

Visibility: Visibility will be moderate but become quite poor in heavier rain in the afternoon. In general navigation will be tricky at height.
